SIZE OF GLADIOLUS BULBS. We offer Gladiolus bulbs in three sizes.

LARGE size, $1\frac{1}{4}$ to 2 inches in diameter. The best blooming size. We recommend this size for immediate results.

MEDIUM size $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter. This size will give good bloom, but a little later than the large size.

SMALL size, $\frac{3}{8}$ to $\frac{3}{4}$ inches. These will make good blooming bulbs for another season, though some will bloom the first year, if planted early.

OUR GUARANTEE. We guarantee our stock to be true to name, clean, vigorous and healthy, free from thrips and disease. Should any error occur in labeling or otherwise and any stock shipped eventually prove untrue, we will replace with true stock and you may keep the stock first sent.

TERMS. Full remittance should accompany all orders. However, we will ship C. O. D. on request, when 25 per cent of the amount of the order is paid in advance.

TRANSPORTATION. We pay all delivery charges unless quoted otherwise.

DISCOUNTS. We allow the following cash discounts, when payment is made in full before shipment except on bulbs at wholesale prices.

10 per cent on orders of \$5 to \$25.

15 per cent on orders of \$25 to \$50.

20 per cent on orders of \$50 or more.

SUBSTITUTIONS. No substitutions will be made unless your order so requests.

GLADIOLUS THRIP

Gladiolus Thrips have caused great damage to Gladiolus during the blooming season in nearly all parts of the U. S. the past two seasons.

The Thrip is a very small insect about 1-20 of an inch in length and not easily seen, except when numerous. Thrips do not overwinter out doors, where the ground freezes. The main source of infection is from planting bulbs infected with the insects. If your Gladiolus did not blossom as good as in former years, it may have been due to the Thrip and you should treat your bulbs before planting.

For treating a small number of bulbs, the simplest and most convenient method is by the use of NAPHTHALENE FLAKES. This material intermixed with the bulbs at the rate of 1 oz. to 100 large bulbs, in a paper bag or box, gives complete control. After 2 or 3 weeks all insects should be dead. Crushed moth balls can be used, if the flakes cannot be obtained.

We believe that all bulbs offered for sale should be treated to eliminate Thrip, as they may be present without it being known. We have accordingly treated our bulbs with the best known methods and we can state with confidence, that our bulbs are free from Thrips.

EXTRACTS FROM LETTERS RECEIVED FROM
OUR CUSTOMERS THE PAST SEASON.

From New Jersey—

"Last winter when I found out that my business would not take up as much time as it had done here-to-fore I decided to look for something else to occupy my spare time. I thought perhaps flowers would interest me so I bought a copy of FLOWER GROWER and selected about half a dozen firms who sold Gladiolus bulbs, stuck two dollars in each order blank and waited for returns. Well they all came, yours last, today. Believe me when I say you sent the nicest looking, largest, cleanest and soundest bulbs of the lot. I am awfully sorry that I did not know about you people before I ordered a bulb but I have found out that it does not always pay to buy through large and fancy catalogs, neither does it pay to go all through the West looking for something better."

From a Florist, Pennsylvania—"APPEAL did the best of all my Glads. Giant flowers, dug out good healthy bulbs and gave a plentiful increase in bulb-lets. I have over 300 varieties but APPEAL had them all beat."

From New York—"I want to thank you for the good service and fine bulbs I have always had from you. Especially, want to tell you that FLOR RICO, which you sent me as an extra last year, I consider the most beautiful purple Glad I have ever grown or seen. ALICE REID is also a beauty."

From Indiana—"The best bulb investment I ever made. Neighbors rave over them."

From Illinois—"Bulbs I got from you last year were very nice and so were the flowers."

From Connecticut—"Am enclosing an order and can truthfully say that I was more than satisfied with last years order. Your variety ALICE REID was the best in my garden and I grow over 100 varieties and 10,000 bulbs. It certainly stands up well and blossomed right to the top."

From Massachusetts—"ALICE REID was one of the loveliest pink Glads I have ever seen. I shall have more next year."

From New York—"I just had to tell you what beautiful Gladiolus I raised last year from your bulbs. People ask me where I get my bulbs and I refer them to you."

From Michigan—"Last spring I sent you a small order for gladiolus bulbs and as an extra you sent me a bulb of Appeal for trial. Well, I've tried it and I'll say it's a grand variety. APPEAL beats everything else in my garden for earliness of bloom. Two long spikes of large flowers. It proved to be one of the strongest growers of over 75 varieties I have and among the tallest in spike length. I have Picardy, Phipps, Minuet, Marmora, Duna, Coronation, Rapture and a raft of others that are supposed to be topnotch, so I am not comparing APPEAL to a lot of scrubs. And so, thank you once more for that fine variety."

I believe I ordered Bleeding Heart and Dr. Bailey from you. They are both beauties and the latter is one of my great favorites."

GLADIOLUS

Our Introductions

ALICE REID (1929) LaFrance pink, overlaid with geranium pink. Long straight spikes of well placed flowers, which open perfectly to the last one. Very early. Large bulbs 10c for 2, Medium 10c for 4, Small 10c for 8.

APACHE (1933). Ground color orange heavily overlaid with smoky purple and streaked with very dark purple, almost black. Large yellow blotch in throat. A very odd color combination. Good healthy grower with tall straight spikes and many good sized flowers open at a time. Large bulbs 25c, Medium 15c, Small 10c.

APPEAL (1931) Tall graceful plant with several very large butterfly like flowers open at one time. Color, beautiful shade of geranium pink with conspicuous yellow lip. Rapid propagator. Large bulbs 10c for 2, Medium 10c for 2 Small 10c for 8.

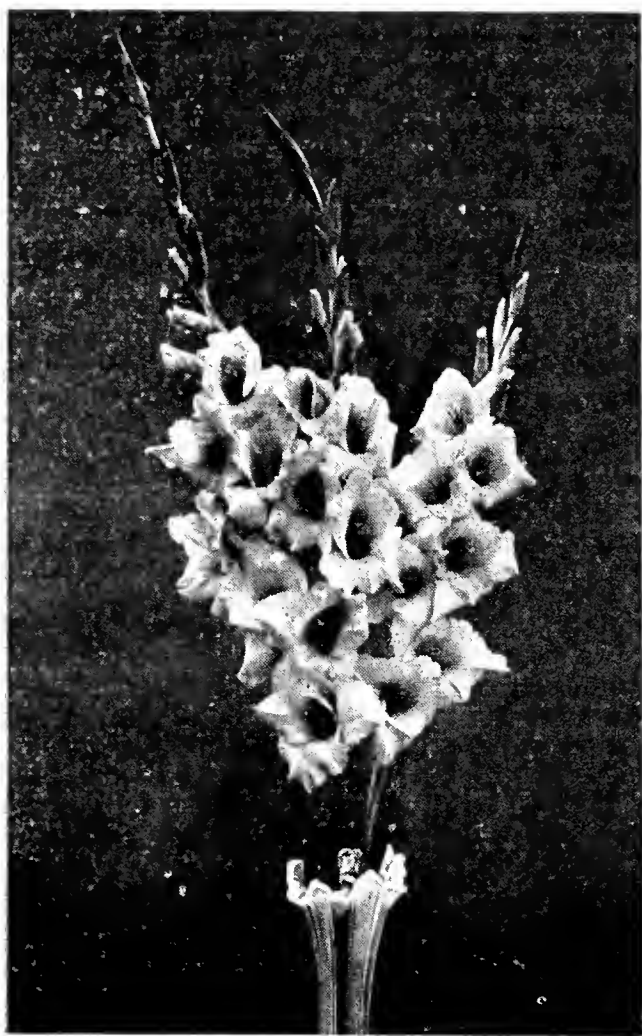

DAFFODIL (Seedling 201) Prim. Grand. The deepest clear yellow Gladiolus, we have ever grown. Tall straight slender spikes, with plenty of 4½ inch florets open at one time. Winner of several first prizes at the State Shows. Greatly admired by Florists. Large bulbs 20c, Medium 15c, Small 10c.

EMPRESS (1933). Rose pink with edges of petals streaked deeper pink. Large conspicuous greenish yellow blotch in throat. 12 or more large well placed flowers open at a time with unopened buds all showing color. One spike makes a good bouquet. A good exhibition novelty. 1st prize seedling, Empire State Gladiolus Show 1932. Large bulbs 50c, Medium 30c, Small 20c.

FLOR-RICO (1929) Rhodamine purple,, upper petals and throat light mallow purple. Intensely ruffled and fluted with three to four large flowers of extra heavy substance open at one time. A distinct purple gladiolus. Large bulbs 10c, Medium 10c for 2, Small 10c for 4.

HONEY (1934) (Prim. Grand.) Color, a soft and pleasing buff pink. Especially attractive in artificial light. Four or five well placed, good sized blooms open at one time on long slender stiff stems that always come straight. Large bulbs will send up two or three spikes of bloom. Extra good propagator. Early. A good cut flower variety. 1st prize in its color class 1933, Empire State Glad Show. Large bulbs 15c each, Medium 10c, Small 10c for 2.

WHITE RIBBON. (1934) Pure white with faint line of purple deep in the throat, cream lip. Very long straight spikes with eight to ten medium size blooms open at one time. Tall, strong grower with healthy foliage. Large bulbs 50c each, Medium 30c, Small 15c.

PRIMROSE QUEEN
